Thank you for your interest in the bilateral remittance matrix. Please note that the bilateral remittance matrix is an analytical estimate derived from a global estimation of bilateral matrix flows. For a detailed description of methodology and strengths and weaknesses of this database, refer to “South-South Migration and Remittances” by Dilip Ratha and William Shaw, World Bank Working Paper 102, June 2007. In order to assist you with your request, please state the specific remittance corridor that you would like data for and send your request via email to migrationandremittances@worldbank.org. Any information provided is confidential, privileged and only for the information of the intended recipient and may not be used commercially, published or redistributed without the prior written consent of KNOMAD/World Bank.
